

SWEN 6301: Presentation Topics and Assigned Groups

Instructor: Ahmed Tamrawi

As a graduate student, you are expected to communicate your findings and observations to others and be able to present your thoughts and ideas in a professional way. As a part of the learning experience set for this course, we are going to ask each group of students to prepare a class presentation on a selected topic from the assigned textbook. The ultimate goal is not to test you, it is all about teaching you how to communicate your ideas, answer questions, and overcome the public speaking fear.

The Table below shows your names, assigned groups, and assigned topics which are chapters from the Code Complete 2 book.

Name	Presentation Topic	Expected Presentation Date
سبيل اعمير هديل حموضه	Chapter 10: General Issues in Using Variables	Saturday October 13, 2018
احمد صباح نصري اللدعة وائل مسك	Chapter 11: The Power of Variable Names	Saturday October 13, 2018
تيموثاوس غانم علاء اسحق نصري اليتيم	Chapter 12: Fundamental Data Types	Saturday October 13, 2018
ربا عيساوي سناء غانم	Chapter 14: Organizing Straight-Line Code Chapter 15: Using Conditionals	Saturday October 20, 2018
براء عياش البراء كفايه	Chapter 16: Controlling Loops	Saturday October 20, 2018
عامر حسن داليا عوده	Chapter 17: Unusual Control Structures	Saturday October 20, 2018
بيسان ابوبكر سماهر دريدي	Chapter 18: Table-Driven Methods	Saturday October 27, 2018
لينا عصفور إبتسال عواشرة	Chapter 19: General Control Issues	Saturday October 27, 2018

Presentation Nature

Do not invest much time into fancy presentations. We care about your skills. Just put enough effort to do something good. Sometimes good metaphors can convey the idea or as they say “*a picture is worth a thousand words.*” Do your best to finish the presentation in less than 40 minutes to allow enough time for other groups presenting at the same day.

You do not need to cover every detail mentioned in the book. Understandable headlines would be sufficient along with your explanation. If you think you do not understand a topic and cannot present it, please let me know so I can take over.

Helpful Resources

I will post slides that you can use in your presentations. These slides are authored by Mustafa Misir and he has granted us permission to use them, but please add proper copyright notice.

Grading

Do not worry much about the grade. The goal as we said earlier is to learn how to communicate your thoughts and understandings in a professional way. This class presentation amounts to 10% of the total grade. I am expecting everyone to score the full grade. Grading will be based on your effort to present the assigned topic, and your thoughtful answers to questions posed by colleagues. I prefer that you say “*I do not know the answer instead of speculations.*” Just be yourself!

Finally, do not hesitate to contact me and good luck!
